

CALL FOR APPLICATIONS: Test and Demonstration of Multimodal Data approaches for Personalised Medicine (*MultiPMDData2026*)

The call aims to

- Bring together enterprises with clinical actors, including healthcare providers, patients, and researchers, to test innovative solutions in controlled real-world settings to address clear needs in managing multimorbidity

- Fund innovation projects in human health that focus on multimodal data usage for PM approaches providing more efficient and personalised management of patients with multimorbidity, having at least two chronic diseases that require management

Who can apply

- Enterprises of all sizes, clinical partners, academia and private non-profit partners
- At least one project partner must represent an enterprise, and at least one additional partner must be a clinical partner
- Each consortium must involve at least three partners from three different EU Member States or Associated Countries whose funding organisations participate in the call
- 19 funding organisations from 16 countries participate in this call with an available budget of approx. 14.8 Mio. €
